Subject: RE: VOCS waters and soils??

Any samples collected today will be water samples. We are all set on sample containers.

Thanks

Subject: VOCS waters and soils??

Assume aqueous samples for 8260?? Wasters calibrations easier and faster, could/should be ready today. Calibrations for soils take longer, so Saturday is more realistic to be ready. Another consideration is the prelims for soils will be wet weight since we'd have to do % solids to get dry weight and that takes longer than the GC/MS runs. We have a box (72 vials) of VOA vials, if we run VOCS within 24hrs of receipt we don't need preservatives - which we are not currently set up to do. Check w/QA officer to make sure this is OK w/Region 6 QA folks.
